Ethernet "Quick Start" guide

CAUTION! If you are not familiar with Ethernet enabled equipment, it may be useful to contact your IT department, network administrator or network consultant for help. Assigning an IP address already in use by another device may cause problems with your network! Instructions for changing the IP address of the computer that will be used for the configuration of this product are given here. Note that these instructions are specifically for computers with the Windows XP operating system. For setup using other operating systems, refer to the appropriate OS user's manual.

SETUP GUIDE

Ethernet Products Quick Start Guide

Opening the LOGIN Web Page

- 1. Connect the supplied GRAY colored XOVER cable between the PC's Ethernet port and the product's NETWORK RJ45's jack.
- 2. Connect the supplied power supply or power cord to the product's power jack and verify that the supply is the correct voltage. Verify that the green POWER LED and left "LINK" LED above the "NET" Network RJ-45 are illuminated

Ethernet (NETWORK) port LED indicator functions

Link LED Left Side		
Color	Meaning	
Off	No Link	
Amber	10 Mbps	
Green	100 Mbps	

Activity LED Right Side	
Color	Meaning
Off	No Activity
Amber	Half Duplex
Green	Full Duplex

We recommend Firefox, Safari for Windows, or Chrome as your browser.

3. Open the product's login page by typing the following URL into the browser: http://192.168.1.55 (http://192.168.1.55/setup.html for the WebSwitch). A username and password is required to change any parameter and are case sensitive.

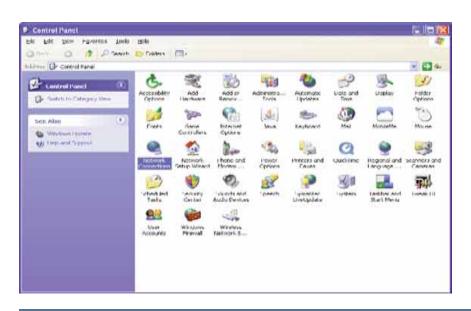

Factory "Login" defaults: **Username:** admin (lower case)

> **Password:** 1234

4. Once you are logged in, follow the setup and/or operational information that are available by downloading the product manual from our web site. If you have trouble downloading the manual, please contact Broadcast Tools® at support@broadcasttools.com or call 360-854-9559.

Step 1: Open the control panel by clicking on the start menu. Click on settings, then click on Control Panel.

NOTE: The control panel shown is in "Classic View". If the control panel is in "Category View", select the "Classic View" option before proceeding.

Products utilizing the Time and Date functions may require an internet connection to access an NTP Time Server.

NOTE:

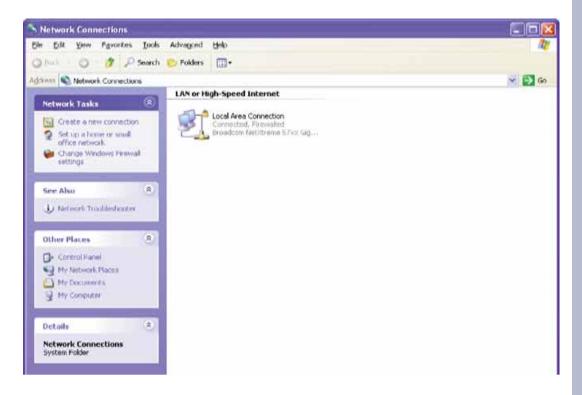

After programming is complete, we suggest that you save a "Screen Shot" of each page and store it in a word processing file for later reference. We also advise printing a copy for your records.

Instructions for changing the IP address of the computer that will be used for the configuration of this product are given below. Note that these instructions are specifically for computers with the Windows XP operating system. For setup using other operating systems, refer to the appropriate OS users manual.

SETUP GUIDE

Ethernet Products Quick Start Guide

Step 2: Double click on the icon labeled Network Connections. The following menu will pop up.

Step 3: Right click on the icon labeled Local Area Connection. Another menu will appear. Select the option at the bottom of the menu labeled Properties. The Local Area Connection Properties window will appear.

Step 4: On the Local Area Connection Properties page, double click on Internet Protocol (TCP/IP) to display properties.

Step 5: Before making any changes to the network settings, write down the current settings (or screen capture the page and print) so that they can be restored once the unit is configured. Next, select the radio button labeled "Use the following IP address" and type in the IP address 192.168.1.60. Type in the subnet mask of 255.255.255.0. Leave the default gateway field blank. Click OK to apply the new settings.
