## Alert Sentinel® 2 Two Station Alert Switcher

List \$679.00

A two station analog relay/switcher following in the footsteps of the STA-III WX. The Alert Sentinel 2 designed to allow the insertion of alert audio into broadcast signal paths. Perfect for alerts from local authorities, meteorologists, or remote broadcasts. It features a POTS telephone hybrid interface and a balanced analog input compatible with a console or 2-way/HAM radio and SD-based audio player. Control via DTMF, TCP/UDP Ethernet, USB serial, or contact closure.

## 2x16 DA/RJ G2 2x8 or 1x16 Distribution Amplifier

List \$459.00

Analog stereo distribution amplifier with RJ45 audio I/O. Stereo (2x8) or monaural (1x16) output set via internal jumpers and stereo line level high-Z inputs, which accepts either a balanced RJ45 (+4 dBu) or an unbalanced RCA (-10 dBV) source. Includes signal bypass relays which passively route input 1 to output 1 in the event of power loss.

## AES Audio Sentinel® 4»Web Web-enabled Four Channel AES/EBU Silence Monitor

List \$1,089.00

Monitor four AES/EBU inputs for digital audio silence, stereo out-of-phase conditions, and AES error. Features include a HTML5 web interface, support for SSL/TLS email alarms, SNMP, and open collector alarm outputs.

## AES DA 2x4 /1x8 G2 Term AES Distribution Amplifier

List \$599.00

The AES DA 2x4/1x8 G2 Term, eight output, two-input AES/EBU distribution amplifier is ideal for distributing AES/EBU signals or word clock at sample rates of up to 96kHz. It can be configured for 2x4 operation, acting as two separate one input, four output DAs, or for 1x8 operation acting as a one input eight output DA.

## ACS 8.4 G2 Stereo Audio Matrix Switcher

List \$1,579.00

8x4 balanced analog stereo matrix audio switcher with RJ45 audio I/O. Front panel, RS-232, TCP/UDP Ethernet and GPIO controllable. 16 PIP/trigger inputs, 16 SPST relay outputs.

**NEW**

**NEW**

## MSRP-3 AES

### Multi-Station Relay Panel 3 AES

A three station AES/EBU digital EAS switcher for adding stations to the ENDEC, DASDEC, or other encoders. RJ45 station audio I/O, analog/AES alert audio in. RS-232 serial, TCP/UDP Ethernet, and closure control, SPST relay outputs.

List \$809.00

## SRC-16 + G2

### Serial/Ethernet Remote Control

Sixteen channel GPIO interface featuring 16 opto-isolated inputs and 16 SPST relay outputs. RS-232 serial and TCP/UDP Ethernet interfaces for computer control. Features include I/O expansion, custom strings, and relay extension cord functionality.

List \$679.00

## MSRP-3

### Three Station Analog EAS Relay

A three station analog stereo EAS switcher for adding stations to the ENDEC, DASDEC or other encoders. RJ45 station audio I/O, balanced alert audio in. RS-232 serial and closure control, SPST relay outputs. MSRP-3 NET with TCP/UDP Ethernet control also available.

List \$629.00

## SS 6.1 MLR/BNC

### Switcher/Router with Mechanical Latching Relays

A transparent 6x1 switcher/router with BNC connectors and mechanical latching relays. Perfect for switching MPX FM baseband or AES-3id signals via RS-232, TCP/UDP Ethernet, or contact closure.

List \$679.00

## ADMS 44.22 G2

### Analog/Digital Stereo Matrix Switcher

8x4 AES/Analog stereo matrix switcher. 4 RJ45 analog inputs, 4 XLR AES inputs, 2 RJ45 analog outputs, 2 XLR AES outputs. Front panel, RS-232, TCP/UDP Ethernet and GPIO controllable. 16 PIP/trigger inputs, 16 SPST relay outputs.

List \$2,369.00
